No. Description S.H.			an ability to apply knowledge of math., science, and engr.	an ability to design & conduct experiments, as well as to analyze & interpret data.	an ability to design a system, component, or process to meet desired needs.	an ability to function on multi-disciplinary teams.	an ability to identify, formulate, & solve engr. problems.	an understanding of prof. and ethical responsibility.	→ an ablity to communicate effectively.	the education necessary to understand a the impact of engr. solutions in global/societal context.	a recognition of the need for an ability to engage in life-long learning.	a knowledge of contemporary issues.	an ability to use the tech., skills, & modern engr. tools necessary for engr. practice.
